

Juno® Podz™ Canless LED Downlights

The NEW Contractor Select™ version of the Juno Podz Canless Downlight is now easier than ever before to order, stock, and install. Through the simplified one-line ordering process, both the trim and remote junction box ship together in one single carton.

Available in 4" and 6" sizes, the Podz' canless design allows for quick installation directly into the plenum from below the ceiling saving the installer time and money. Additionally, the Podz LED downlights provide increased flexibility by providing switches directly on the fixture to toggle between three lumen outputs, five color temperatures, and a WarmDim® setting. Make Podz your go-to fixture that easily adapts to different ceiling heights and performance levels required by the application.

Features include:

- Complete fixture including trim and remodel junction box ships in one carton
- Easy-to-handle canless design can be installed from below the ceiling, no housing needed
- IC-Rated for direct contact with insulation
- Deeply regressed light source provides traditional downlight aesthetics
- Patent-pending light engine featuring switchable white, adjustable lumen output and WarmDim® technology

Adjustable Lumens

Juno® Podz™ Canless LED Downlights

LED CCT Adjustment

Switchable white options in 27K, 30K, 35K, 40K and 50K. Built in WarmDim® setting warms your space from 2850K to 1900K.

Adjustable Lumen Output

Select 700L, 1000L or 1200L performance.

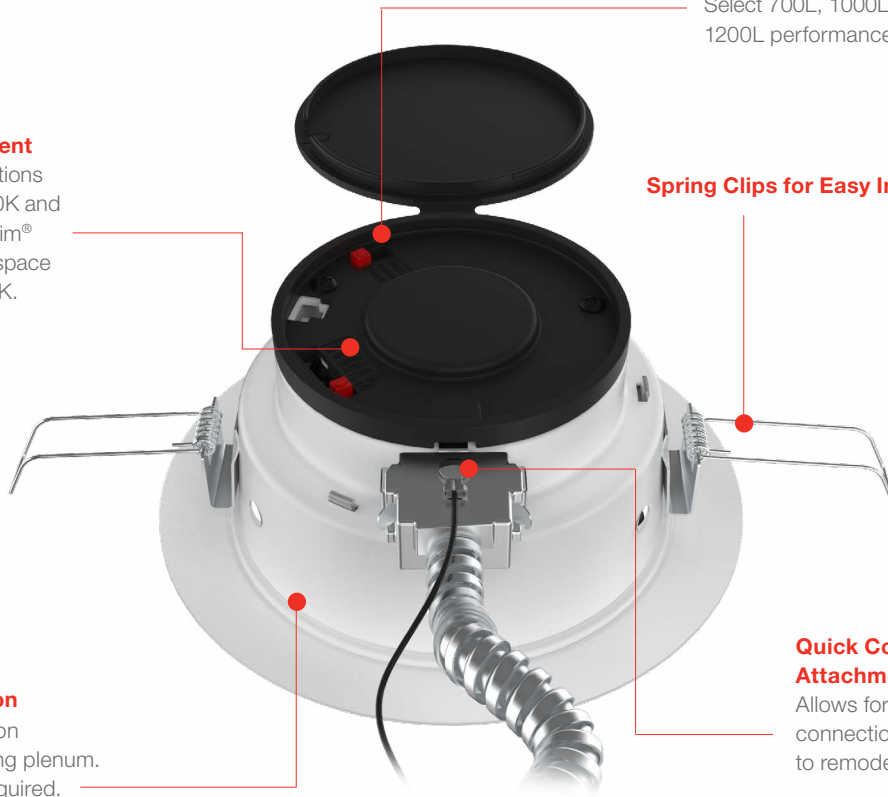

Spring Clips for Easy Install

Quick Connect Electrical Attachment

Allows for easy electrical connection of the trim module to remodel junction box.

Canless Installation

IC rated for installation directly into the ceiling plenum. No other housing required. Shallow, < 3" form factor.
