

## VCVL LED

### Maximum Comfort with Elegant Style

#### Comfort Anywhere You Want It

The Lithonia Lighting® VCVL LED (Visually Comfortable Versatile Luminaire) creates the quality of light you want, where and when you need it – all in one architecturally striking design.

#### Visual Appeal

The sleek VCVL features a recessed prismatic lens that helps conceal the source while putting the most comfortable light exactly where it should be. VCVL Ultimate (VCVLX) recesses the lens even more to further eliminate all high-angle light associated with glare, while the patented transition zone reduces the contrast ratio between source and surroundings. These luminaires also eliminate discomfort associated with LED pixelation with light-guide technology, resulting in a uniformly luminous source.

Add the up-light option and you will get a dedicated LED module and optics that enhances the open look and feel in any space.

#### The Most Versatile Optical and Mounting Selection

Offering four distributions and seven lumen packages, VCVL is the most complete, versatile luminaire for any space you choose. With VCVL's array of mounting options, you can illuminate any building style or architectural plan.

#### Energy Savings for Even More Comfort

VCVL has industry-leading efficacy of up to 145 LPW and low initial cost, making it the wallet-friendly choice for your next project. Add standalone or wireless networked controls solutions for even greater savings.

#### Quick Facts:

- Beautiful, architecturally striking form
- Visually quiet with glare-suppression qualities
- Wide variety of mounting options making it suitable use in any application
- Uplighting to further enhance the visual experience
- Highly energy efficient – save precious resources while being a good steward of the planet
- Choose from many optical configurations, lumen packages, battery wattages and motion sensor options
